PRODUCT CATALOG ★ AUGUST 2024

**A**t Marki Microwave, we empower our customers to **design faster, simplify production, eliminate complexity, and shatter performance barriers**. We achieve this through intensive research, rigorous product development, and advanced, carefully controlled production.

## PERFORMANCE

By combining time-honored fabrication and assembly techniques with a modern design approach, we can push the technological boundaries of broadband RF and microwave components like never before. With proprietary innovations such as our T3 Mixer® line and high isolation bridge power combiners, and an expanding portfolio of MMIC devices, we seek to provide the most comprehensive selection of high performance microwave components in the world.

## HIGH FREQUENCY OPERATION

High frequencies offer advantages of more contiguous bandwidth supporting high throughput systems, or smaller wavelength signals that enable high resolution imaging and RADAR solutions. Developing products at mmWave and sub-THz frequencies requires attention to the smallest detail and 3D simulations of the entire product, including the environment in which it will be used.

Marki Microwave not only develops MMIC die products but also offers a range of different form factors optimized for high frequency operation.

## PACKAGING

As functions become more complex it is necessary to consider how the role of packaging can affect the design-in-process. We simplify product designs with easy-to-use packages that allow the MMIC design to be realized in both surface mount and connectorized forms, as well as solutions that combine multiple functions into one package. By co-designing the die and package, Marki Microwave ensures optimal performance at the board level. From our chip scale packaging (CSP) that delivers up to 90 GHz in a surface mount footprint to the flexible, multi-octave M-Package designs that enable DC to 120 GHz in a connectorized form, Marki Microwave continues to lead in packaging innovation.

# THE TRUSTED LEADER WHEN PERFORMANCE MATTERS

For over 30 years, we've solved the industry's toughest technical problems by creating a robust portfolio of performance shattering RF and microwave products. Founded in 1991 with the goal of developing the best mixers in the industry, today Marki Microwave is a single source for high performance, broadband microwave technology, supporting multiple form factors including die, surface mount, and connectorized solutions for the entire RF block diagram.

Inventing leading-edge products and focusing on key technical challenges facing the evolving RF and microwave industry have been the cornerstones of our success. From simulation and design to packaging, innovation and creativity are part of our DNA, propelling us forward as we continue to challenge the status quo.

As demands from RF and microwave markets continue to evolve and the supply base consolidates, Marki Microwave remains dedicated to creating a future of limitless possibilities, expanding our catalog and empowering the industry to develop next-generation systems.
